GEOCHIMICA ET COSMOCHIMICA ACTA

EXECUTIVE EDITORS

PROF. C. W. CORRENS *Sedimentpetrographisches Institut der Universität, Lotzestr.* 13, *Göttingen, Germany*
PROF. E. INGERSON *Department of Geology, University of Texas, Austin* 12, *Texas, U.S.A.*
PROF. L. R. WAGER, F.R.S. *Department of Geology and Mineralogy, The University Museum, Oxford, England*

EDITORS

PROF. L. H. AHRENS *Department of Chemistry, University of Capetown, Rondebosch, Cape Province, South Africa*
DR. S. R. NOCKOLDS *Department of Mineralogy and Petrology, The University, Cambridge, England*
PROF. H. C. UREY, For. Mem. R. S. *University of California, La Jolla, California, U.S.A.*
DR. JOHN VERHOOGEN *Department of Geology, University of California, Berkeley, California, U.S.A.*
PROF. A. P. VINOGRADOV *Vernadsky Institute, Moscow, U.S.S.R.*
PROF. W. A. WAHL, *Observatoriegaten* 8, *Helsingfors, Finland*

INFORMATION FOR CONTRIBUTORS

I. GENERAL

1. Papers should be submitted to the appropriate Executive Editor—Prof. L. R. WAGER for papers from the United Kingdom and British Commonwealth, and for papers in English from Europe; Prof. C. W. CORRENS for papers in German or French; Prof. E. INGERSON for papers from the American continents. Papers submitted for publication will naturally be judged from the standpoint of scientific originality and novelty. Technical details of apparatus used in scientific investigation can, however, be presented in brief notes. Critical comments or preliminary results requiring early publication should be submitted as letters to the editors. Where possible, letters should be confined to 500 words. The preparation of progress reports and review articles will be invited by the editors from time to time. The journal appears as independent and complete numbers, which are combined into volumes of about 300 pages.

2. Only papers which have not been previously published can be accepted. Authors must agree not to publish elsewhere a paper submitted to and accepted by *Geochimica et Cosmochimica Acta*.

3. Fifty reprints of each paper are provided free. Additional copies can be purchased if ordered at the time the first proofs are returned. A reprint order form will accompany first proofs.

II. SCRIPT REQUIREMENTS

1. Scripts must be written in one of the three official languages—English, French or German.

2. The script should be typed (not a carbon copy). The text must be ready for printing and should be carefully checked for errors. Authors will receive proofs for correction. The original script plus two copies will assist in expediting publication.

3. Illustrations should accompany the script, mounted on separate sheets. Line diagrams that require to be redrawn should include all relevant details. Half-tone illustrations should be restricted to the minimum necessary. Photographs should be enlarged sufficiently to permit their clear reproduction, and if words or numbers appear on them, two copies should be sent, one clearly printed and the other without inscription. All illustrations should be provided with descriptive legends, which should be given on a separate sheet. Any lettering on diagrams—other than Greek letters, symbols, etc.—should be stencilled and should be sufficiently large and bold to permit reproduction when the diagram has been reduced to a size suitable for inclusion in the journal.

4. References in the text should be given by quoting the author's name and year of publication, i.e. AHRENS (1952). **Full references should be listed at the end of each paper, in alphabetical order, in the following manner:**

AHRENS, L. H. (1952) The use of ionization potentials—I. Ionic radii of the elements. *Geochim. et Cosmochim. Acta* **2**, 155–169.

and should include the full title of the article, standard abbreviated title of the journal, year, volume number and inclusive page numbers.

5. The text of articles submitted should be concise and in a readily understandable style. The technical description of the methods used should only be given in detail when such methods are new. The essential contents of each paper should be briefly recapitulated in an abstract in English. Such an abstract may, however, be submitted by the author in the language of the original typescript for translation into English by the editorial staff.

6. To conserve space, authors are requested to mark less important portions of the paper (such as description of methods, record of experimental results, etc.) for printing in smaller type.

7. Indices of refraction should be denoted by the symbols α, β, γ, ω, ε, n and vibration directions by X, Y, Z, O and E.

PERGAMON PRESS LTD.

HEADINGTON HILL HALL, OXFORD 122 EAST 55TH STREET, NEW YORK 22, N.Y.

CONTENTS

Numbers 1/2

KARL K. TUREKIAN and MICHAEL H. CARR: Chromium, cobalt and strontium in some Bureau of Standards rock reference samples 1

E. L. FIREMAN and G. A. KISTNER: The nature of dust collected at high altitudes 10

J. REGIS DUFFY, NORMAN O. SMITH and BARTHOLOMEW NAGY: Solubility of natural gases in aqueous salt solutions. 1. 23

W. HUNTER and D. W. PARKIN: Cosmic dust in Tertiary rock and the lunar surface 32

P. K. KURODA: The time interval between nucleosynthesis and formation of the earth 40

HELMUT G. F. WINKLER und HILMAR VON PLATEN: Experimentelle Gesteinsmetamorphose—IV 48

HEINZ STAUFFER: Primordial argon and neon in carbonaceous chondrites and ureilites 70

MICHAEL E. LIPSCHUTZ and EDWARD ANDERS: The record in the meteorites—IV. Origin of diamonds in iron meteorites 83

FRANK WLOTZKA: Untersuchungen zur Geochemie des Stickoffs . . 106

Book reviews: 155

Papers to be published in future issues 158

Numbers 3/4

A. E. RINGWOOD: Chemical and genetic relationships among meteorites 159

E. R. DUFRESNE and S. K. ROY: A new phosphate mineral from the Springwater pallasite 198

NG SIEW KEE and C. BLOOMFIELD: The solution of some minor element oxides by decomposing plant materials 206

JAMES C. COBB and J. LAURENCE KULP: Isotopic geochemistry of uranium and lead in the Swedish kolm and its associated shale . . . 226

H. G. F. WINKLER und H. VON PLATEN: Experimentelle Gesteinsmetamorphose—V. 250

S. K. El WAKEEL and J. P. RILEY: Chemical and mineralogical studies of fossil red clays from Timor 260

M. A. Tamers, J. J. Stipp and J. Collier: High sensitivity detection of naturally occurring radiocarbon—I. 266

Charles D. Keeling: The concentration and isotopic abundances of carbon dioxide in rural and marine air 277

Charles D. Keeling: A mechanism for cyclic enrichment of carbon-12 by terrestrial plants 299

Geochemical Notes:

W. M. Tupper and D. H. Loring: On the relative abundance of rubidium and strontium in vitrain ashes from coals in Nova Scotia . . . 314

B. Zaslow and L. M. Kellogg: An analysis of metallic spheroids from Meteor Crater, Arizona 315

Letters to the Editors:

J. Jedwab: Beryllium in river water 317

Book Review: 318
